

# CENTRAL METALS

## Central Metals Downpipes

Hand produced for a **BETTER PRODUCT**

Central Metals downpipes are the only hand-made, volume produced downpipes in the market. Each downpipe is individually made ensuring a high level of craftsmanship and quality control.

Zincalume®

Colorbond®

## Round Downpipes

With five stages of production and extra slip our round downpipes are unique, delivering a smooth, clean look, without the lines and fluting that often occur in a rollformed product.

They are further enhanced by our hand-made clips, which fit snugly around each downpipe, enabling secure fixing to the wall. Each COLORBOND® steel clip has a double edge fold making it safer to handle with a high quality finish.

## Square Downpipes

Being hand made every bend in our downpipes is sharp and crisp resulting in a completely square, smarter looking product. Our downpipes sit flush against the wall, no twisting or gaps and slip  $\frac{1}{3}$  of their length.

Our clips are punched using a custom made die, ensuring a consistent quality product.

## Why you should use our downpipes

Our round and square downpipes deliver:

- **a secure parallel seam** – each downpipe is made from a hand cut, tapered blank. Unlike rollformed products, our seams are consistently formed ensuring no splitting
- **easy slip of at least  $\frac{1}{3}$  of the length of the downpipe** – creating stronger joints and faster, easier installation. No cutting, no waste and more cost effective
- **easier mitring** – with parallel seams and square bending, our downpipes mitre easily. Elbows and shoes are neatly formed with effective waterproof joints
- **material warranties** – we only use next generation BlueScope ZINCALUME® steel and COLORBOND® steel, so you are covered by BlueScope Steel material warranties.

Ordering is easy using our free iPad app, and our 24 hour turnaround guarantees next day delivery. Download the app today from our website ([www.centralmetals.com.au](http://www.centralmetals.com.au)) or the Apple app store.
